

Case study - Assets supervision

Oil & Gas

Client :

The world's leading pipeline manufacturer

Issue:

Integrate an RFID solution for an extremely harsh environment (Heat, pressure, friction, metal environment, corrosive product restrictions) to provide oil rigs with accurate tracking for drilling equipment, from when they arrive onsite to installation in oil wells.

Solution:

- Range of ATEX and IECEx certified UHF readers
- Range of metal tags specially designed for the application

BENEFITS:

Smoother drill pipe management

Reliable tracking of pipes entering and leaving drilling sites

Faster drilling process

Reliable tracking and optimized production costs
