STid's Spectre Vehicle ID Reader Wins "Special Mention" Award at Expoprotection

A jury of 9 end-user experts awarded STid' Spectre UHF-based vehicle ID reader from more than 30 participants for its ability to make UHF long distance identification both instinctive and extremely secure. Spectre is the first of a new generation: discreet by design, flexible in its configuration, secure and encrypted in its communication. It offers reading distances up to 43 ft and reliability for smooth vehicle access. The new long-range reader is built to perform for up to four driveways, even in highly challenging environments.

F.I.t.r.: Maé Tholoniât, Marketing Product Manager at STid, Pierre-Antoine Larrera de Morel, STid Sales Director and a member of the jury.
