

STid and Cisper have established a partnership.

STid, a leading developer and designer of industrial traceability solutions for use in harsh environments and Cisper have decided to establish a partnership together. With this partnership Cisper extends the offering to its current customers with high Industrial grade reader products.

Leon de Ridder, Sales Director at Cisper, comments: *'By adding the products from STid to our portfolio, we extend our offering to our current customers with high industrial grade reader products, even in ATEX zones. We hope that this partnership agreement is just the first step in a long-term relationship with STid.'*

'To partner up with Cisper is an obvious choice. As a well-known RFID specialist, Cisper offers excellent product and application knowledge as well as a high logistic service level. Our customers in Europe can now buy their Industrial STid reader products from Cisper. We are looking forward to working with the Cisper team' says Mickaël Wajnglas, Product Manager at STid

About STid

STid is a leading developer and designer of industrial traceability solutions in harsh environments. By transforming assets into smart, communicating objects throughout the whole supply chain, STid help reinvent the process management. STid assist the most demanding industries in improving their security and manage their ROI through contactless (RFID, NFC, Bluetooth®) and smart (Internet of Things – IoT, Machineto-Machine – M2M) identification solutions. STid's experience in end-to-end project management and their constant quest for excellence provides them with a head-start in understanding the tough requirements of aeronautical, energy, Defense or other industries.
